

Stink's worst enemy

BIO-ENGINEERED FOR
FOR GARBAGE AND WASTE HAULERS

BACTERIA / DIGESTANT / DEODORANT
WITH FIFTH GENERATION MICROBIAL TECHNOLOGY™

MAMMOTH JACK is a complex blend of 200 billion naturally-occurring bacteria created to combat extreme odors found in the garbage & waste hauling industry. Mammoth Jack goes to work immediately upon contact against the toughest odor causing sources, such as urine, feces, blood, vomit, food spills, garbage, grease and other organic waste.

Mammoth Jack's bio-enzymatic product base digests solid organic material at the source while deodorizing. Mammoth Jack Bacteria/Digestant/Deodorant with Fifth Generation Microbial Technology™ is without a doubt "stink's worst enemy."

How to use Mammoth Jack Bacteria/Digestant/Deodorant

Garbage trucks, dumpsters, rendering plants-trucks, and other appropriate locations. Always remove solids before using this product.

Dilute Mammoth Jack 1:1 (128 oz. per gallon or 960 mil. of warm water), and apply with a pump-up sprayer directly onto the source of odor. Mammoth Jack must contact the odor source to be effective, and the area must be thoroughly wet for maximum performance. For routine maintenance after initial use, thoroughly apply Mammoth Jack at 1:5 (21 oz. per gallon or 180 mil. of warm water) to problem areas.

Marine: (Towboat bilge and sewage systems.) For peak odor control and digestion in towboat sewage systems, add one gallon of Mammoth Jack to 500 gallons of sewage per week. For bilges, add one gallon Mammoth Jack to the bilge system as needed.

Portable Toilet: (Airplanes, buses, trains, campers) Add one quart (32 oz./0.946 liters) of Mammoth Jack to a 40 gallon tank, per change.

Restroom Floor/Odor Control: Control urine odor by mopping floors weekly with Mammoth Jack diluted 1:20 (6 oz. per gallon or 45 mil. warm water).

Animal Waste Control: Apply Mammoth Jack weekly or as often as needed by spraying 1:10 (12 oz. per gallon or 90 mil. warm water dilution) onto floors, walls and fencing in dog kennels.

Drain Lines/Pipes/Plumbing: To prevent clogging, use

Mammoth Jack two to four times a week at 4 oz. (118 mil.) for every two-inch inside diameter of drain pipe. For best results, apply this product when the drain flow is lowest.

Do not spray into air or use as an air freshener

Caution: This product causes eye and skin irritation and may be harmful if swallowed. Inhalation of product mist may cause respiratory irritation. Mammoth Jack contains living bacterial spores. The bacteria in this product may cause infection if introduced in sufficient quantity into an open wound, broken skin or mucous membrane.

Product Information

HMIS Hazard Rating: Health = 1, Flammability = 0, Reactivity = 0.

Contains: Water (CAS #7732-15-5), nonylphenol ethoxylate (CAS #9016-45-9), bacterial cultures (aerobic and anaerobic varieties).

Personal Protective Equipment Recommendations: Wear splash goggles and rubber gloves. Some individuals may be sensitive to ingredients in this product. Before using, read this label and the product MSDS. If you have more questions, consult your employer or a doctor.

Important: Do not use with hot water, bleach, disinfectants or chemical drain openers. These products will reduce product performance.

First Aid

Eyes: Remove contact lenses. Flush eyes with water for 15 minutes. See doctor.

Skin: Remove contaminated clothes. Wash skin thoroughly with soap and water. Apply topical antiseptic to open wounds or broken skin. If irritation develops, see a doctor.

If Swallowed: Do not induce vomiting. Drink one to two glasses of water to dilute product. See a doctor.

If Inhaled: Move to fresh air. If irritation persists, see a doctor.

Storage: Store Mammoth Jack in a cool, dry place. Do not freeze or heat above 110 degrees F (43C). Do not store in direct sunlight. **Never mix Mammoth Jack with other chemicals.**

Additional Recommendations

For a more thorough cleaning, we recommend pre-washing affected trucks and containers with Mule Head Brand Double-Team™ or Gee & Haw™ truck and trailer wash to remove solids and other stubborn waste deposits.

This will allow Mammoth Jack™ bacteria to penetrate deeper into crevices where smelly materials are embedded. These products are available from your Mule Head Brand® distributor.
